# INTRODUCTION

## EXPLANATION

Before beginning to use the classification read carefully at least the paragraphs in large type.

This abridgment has been prepared to meet the needs of small libraries. The short forms given in these schedules may be changed to fuller forms by adding extra figures as given in the full edition.

**Plan** This classification divides the field of knowledge into 9 main classes, numbered 1 to 9. Cyclopedias, periodicals, etc. so general as to belong to no one of these classes, are marked 0 (naught) and form a 10th class. Each class is similarly separated into 9 divisions, general works belonging to no division having 0 in place of the division number. Divisions are similarly divided into 9 sections. Thus 512 means class 5 Pure science, division 1 Mathematics, section 2 Algebra, and every algebra is numbered 512. A class number, giving class, division and section, is applied to every book and pamphlet in the library.

Books are arranged on the shelves by class numbers in decimal numerical order. Since each number means a definite subject, all books on any subject will stand together. These tables show the order of subjects. Thus 512 Algebra precedes 513 Geometry and follows 511 Arithmetic.

**Summaries** The first page of tables shows the 10 classes into which all topics are divided. The next page shows the 9 divisions of each of the 10 classes and is useful as a bird's-eye view of the whole scheme.

**Tables** Following these 2 summaries are the annotated tables which repeat in proper order all the classes, divisions, sections and subsections. Synonymous terms, examples, brief notes and various catchwords are often added to the simple heads to give users a fuller and clearer idea of the field which each number covers.

**Relative index** An alphabetic index of all the heads, an important feature of the system, follows the tables. It refers by class number to the exact place of each in the tables. This index also includes many synonyms and alternative names for the heads as well as numerous other entries likely to help a user find his subject readily. If a user who knows just where to turn to a subject in the tables will consult the index, he may be put on track of valuable allied matter which otherwise he would overlook.

Most names of countries, towns, animals, plants, etc. have been omitted, the Index containing only those mentioned in the tables; e.g. it can not enumerate all species of plants, but when, for example, the classifier has found from the proper reference books that *Penicillium* is a fungus, the index will send him to 589.2 and he can classify a monograph on that subject.

**Relative location** By relative location and decimal class numbers the simple arabic numbers tell of each book and pamphlet both *what* it is and *where* it is.

Books on the same subject and therefore having the same class number always stand together, but are further arranged alphabetically by authors' surnames; e.g. United States histories are all 973, but Bancroft, Eggleston, McMasters and Wilson would stand in this order. (See also p. 8, Book numbers) Shelves need not be marked, but the beginning of each subject may be shown by a bold class number on a movable carrier just under or before the first book bearing that number.

**Sizes on shelves** Shelve octavos and all smaller books together in one series, and arrange in parallel libraries only quartos and folios, which are too tall for the regular shelves. A size letter prefix to the book number shows the series in which any oversize book is put; e.g. 749 qB shows that book B on Artistic furniture is too large for the regular shelves, so is placed in the 'q' or quarto series. A wood or pasteboard dummy to show location of a book not in its regular place is a useful device.

## Suggestions to users

**Number of figures to use** In very small collections 2 figures might do till growth required further division; but it is economy, and saves handling the books a second time, to use at least 3 figures at first, even in the smallest collection.

**Familiarity with tables** Get a general knowledge of the scheme by learning the 10 main classes (you will soon know the 100 divisions also without special study), so that from its first figure, without referring to the tables, you can tell to what subject a given number belongs. Familiarity with subdivisions will come gradually. Using the tables alone, and then always verifying your result by the index, you will more rapidly learn the classification and gain facility in using it. To do this, decide first to which of the 10 classes the subject belongs; next, take that class as if there were no other, and decide to which of its 10 divisions the subject belongs; then in the same way select its section, thus running down your topic in its grooves, which become tenfold narrower at each step.

**Use of index** *As a check against error, use index freely,* even tho familiar with the scheme. By consulting the index to the full classification, subjects omitted from this abridgment will be found assigned with allied subjects to their proper heads, thus deciding at once most doubtful points.

**Subject of a book** To determine the subject of a book consult:

- 1 **The title**, since it is generally chosen to show what the book is about. But as many titles are misleading, never class from title alone but always examine also

- 2 **Table of contents**, which is the best guide to the true subject. If there is no table of contents read

- 3 **Chapter heads** or marginal topics.

- 4 **Preface** Unless already certain, glance thru preface to catch the author's point of view and verify impressions gained from title and contents.

- 5 **Reference books** Use appropriate reference books when in doubt.

**6 Subject matter** If still uncertain put book aside on an 'Under consideration' shelf till you can examine it more thoroly or consult

**7 Specialists** Experts, competent to define true subject and relation, are usually glad to examine any books in their departments.

**Assigning class numbers** After deciding what the book is about, find this subject in the tables, either thru the index or by using the tables directly.

1. *Put each book under the subject to the student of which it is most useful*, unless local reasons 'attract' it to a place still more usefull in your library. See p. 8, §7.

2. The *content* or real subject of a book, not the *form* or the accidental wording of its title, determines its place.

Therefore put a philosophy of art with Art, not with Philosophy; a history of mathematics with Mathematics, not with History; for philosophy or history is simply the *form* which these books have taken. Their true *content* or subject is Art or Mathematics, and to the student of these subjects they are the most useful.

3. The main objective in classifying any book is to put it *under the subject where it will be of greatest value*.

4. *Assign every book to the most specific head that will contain it*; i.e. do not mark all ancient history 930, but put history of ancient Rome in 937, of ancient Greece in 938, etc.

If there are only 10 books on a given subject it is useful to have them groupd by topics or form of treatment, for otherwise they have only accidental order which serves no one. If a reader wishes a specific subject, he is sent to the exact place by the subject index; if, however, he wishes a specific book, he should go, not to the shelves, but to the name catalog, where he can find its place quickest. If he wishes to study the library's resources at the shelves, he will be *greatly helpt by close classification*.

Whether there are 1 or 1000 books on any topic, they take no more shelf space if clast minutely, and the work is done once for all. When large accessions come this number will not have to be altered. In a relative location, the number of books you have on any subject has no special weight; any number of consecutive topics without a book yet in them wastes no space on shelves, as the numbers are merely skipt. This plan not only does no harm, but has the considerable value of showing that you have nothing on the subject; a piece of information second in value only to finding something, for one need no longer search.

5. The *predominant tendency* or obvious purpose of a book usually decides its class number at once. If, however, a book treats of 2 or more different subjects, assign it to the place where it will be most useful.

6. If 2 subjects have distinct page limitations, class under the first, unless the second is decidedly more important or much greater in bulk.

7. Consider not only scope and tendency of each book, but also the nature and specialties of each library.

Any subject on which a library specializes naturally attracts allied subjects; e.g. a book on fishing which an agricultural library puts under 639, has also a place in 799, where the sportsman wants it.

8. If a book treats of 4 or more sections of any division, give it the division number, instead of the most important section number; e.g. class a volume on light, heat and sound, under the head most fully discust. But if it treats also of mechanics, class as 530, or general physics.

9. To secure uniformity, make notes for future reference of all difficulties and decisions; for it is more important to *put books on the same subject together* than to put them in the absolutely correct place.

10. Separate collected works, libraries, etc. and class the parts as independent works; or keep them together, and assign them like individual books to the most specific head that will contain them; or assign them to the most prominent of the various subjects of which they treat. Of these 3 plans the first is the best, unless the books are titled and volumed as a set.

11. Class translations, 'tales from,' reviews, keys, analyses, answers and other books about a specific book with the original book, as being there most useful.

**Book numbers** With this abridgment the arrangement below of books in each class by author's surnames is recommended; tho some experienst library organizers advise omitting book numbers entirely and using author's surname in binder's title or written on label for arranging books on shelves and charging loans.

Under class number on back of each book put initial and first figure of its author's surname taken from Cutter or Cutter-Sanborn author tables; e.g. English history by Gardiner 942 G1. Use the *same initial and figure* for all books by the *same author in any one class*; e.g. if in class 942, History of England, Gardiner's *Outline of English*

history were G1, Green's *History of the English people* would be G8. Class and book number together make a short 'call number' identifying every book in the library; e.g. 942 G1 'calls' for Gardiner's *Outline*, as no other book in that library has exactly that number. A glance at the shelf list translates any call number into author and title. If any class outgrows this abbreviated plan apply the full book number as given in the author table. Practise need not be uniform in all classes but exceptions should be plainly noted.

**Biography book numbers** To keep lives of the same person together, assign book numbers in individual biography from name of person written about instead of from name of writer. See notes to 920 in Tables.

**Fiction numbers** For fiction in English, omit the class number altogether and alphabet by authors' surnames. Number both fiction and biography by the Cutter or Cutter-Sanborn author table.

Class fiction in foreign languages with the literature of its language; e.g. Hugo's *Les misérables* in French with 843, but put an English translation in its alphabetic place in unclast fiction.

**Form distinctions** Except for a few cases shown in full *Decimal Classification* and to a less extent in *Abridged*, the following form divisions may be added to any subject number: 01 philosophy, theories, etc.; 02 compends, outlines; 03 dictionaries, cyclopedias; 04 essays, lectures, letters, etc.; 05 periodicals, magazines, etc.; 06 societies, associations (transactions, reports, etc.); 07 education, study, teaching, training, etc.; 08 polygraphy, collections, etc.; 09 history and general local treatment. This series of form division numbers is extensively subdivided on p. 1880-82 of unabridged *Decimal Classification*, edition 14, as part of Appendix table 2, Common subdivisions. If the numbers to which these form divisions are attached end in 0 this figure (as part of the form division) is not repeated; e.g. theory of economics is 330.1, *not* 330.01; a geologic periodical is 550.5, *not* 550.05.

**Divided like** The numbers below may be subdivided as in the following tables and in many cases may be further subdivided as in full *Decimal Classification*. Also many numbers not subdivided at all in *Abridged* may be extensively subdivided as in full.

016 and 375 may be divided like full classification; e.g. Bibliography of engineering 016.62, Political science in the curriculum 375.32.

Numbers divided like 930-999 are: 015, 309.1, 327, 342, 349, 354 (for governments outside the United States), 374.9, 376.8, 581.9, 591.9, 911, 912, etc.; e.g. Publishers weekly 015.73, Social conditions in London 309.1421, Roman law 349.37, Vassar college 376.8747, Map of Louisiana 912.763.

Numbers divided like 940-999 are: 274-279, 314-319, 324, 325, 328, 336, 373.4-.9, 378.4-.9 (except 378.99), 379.4-.9, 508.4-.9, 554-559, etc.; e.g. General church history of Belgium 274.93, Foreign population in Illinois 325.773, Scientific travels in Brazil 508.81.

353.9 may be subdivided by states like 974-979; e.g. Government of Virginia 353.955.

924-928 may be divided like 400-800; e.g. Biographies of astronomers 925.2, Biographies of American poets 928.11.

Certain numbers may be divided like certain other numbers or groups of numbers representing allied subjects: e.g. 299 is divided ethnically like 491-499, e.g. Egyptian religion 299.3; 561 like 580 Botany, e.g. Fossil ferns 561.7; 562-569 like 592-599 Zoology, e.g. Fossil reptiles 568.1; 619 like 636 Domestic animals, e.g. Diseases of horses 619.1.

Each of the numbers above may be subdivided more minutely by use of full tables, where many further examples of 'divided like' numbers may be found.

### Variations from printed scheme

**1 Letter notations for changes** Copyright of the *Decimal Classification* is maintained to avoid the confusion to its users caused by the printing of unauthorized variations. Every user, however, has entire freedom to make such changes as he desires, under certain simple restrictions. If alterations seem needed, add a letter or other nonnumerical character to indicate the new meaning. This *Abridged Classification* does not furnish data enough for intelligent criticism. The subdivisions of the full *Classification* make apparent many reasons which this abridgment can not show.

**Fiction** As half the circulation in popular libraries is often fiction, omit the class number entirely and use merely the book number, as described on p. 8-9. No class number then means fiction in the English language.

*Juveniles* Class juveniles as if for adults, prefixing J to the class numbers to show their special character. Use J alone as class mark for juvenile fiction. These books may then be arranged in a parallel library by themselves, so that J 942, juvenile history of England, comes between J 941, juvenile history of Scotland, and J 943, juvenile history of Germany.

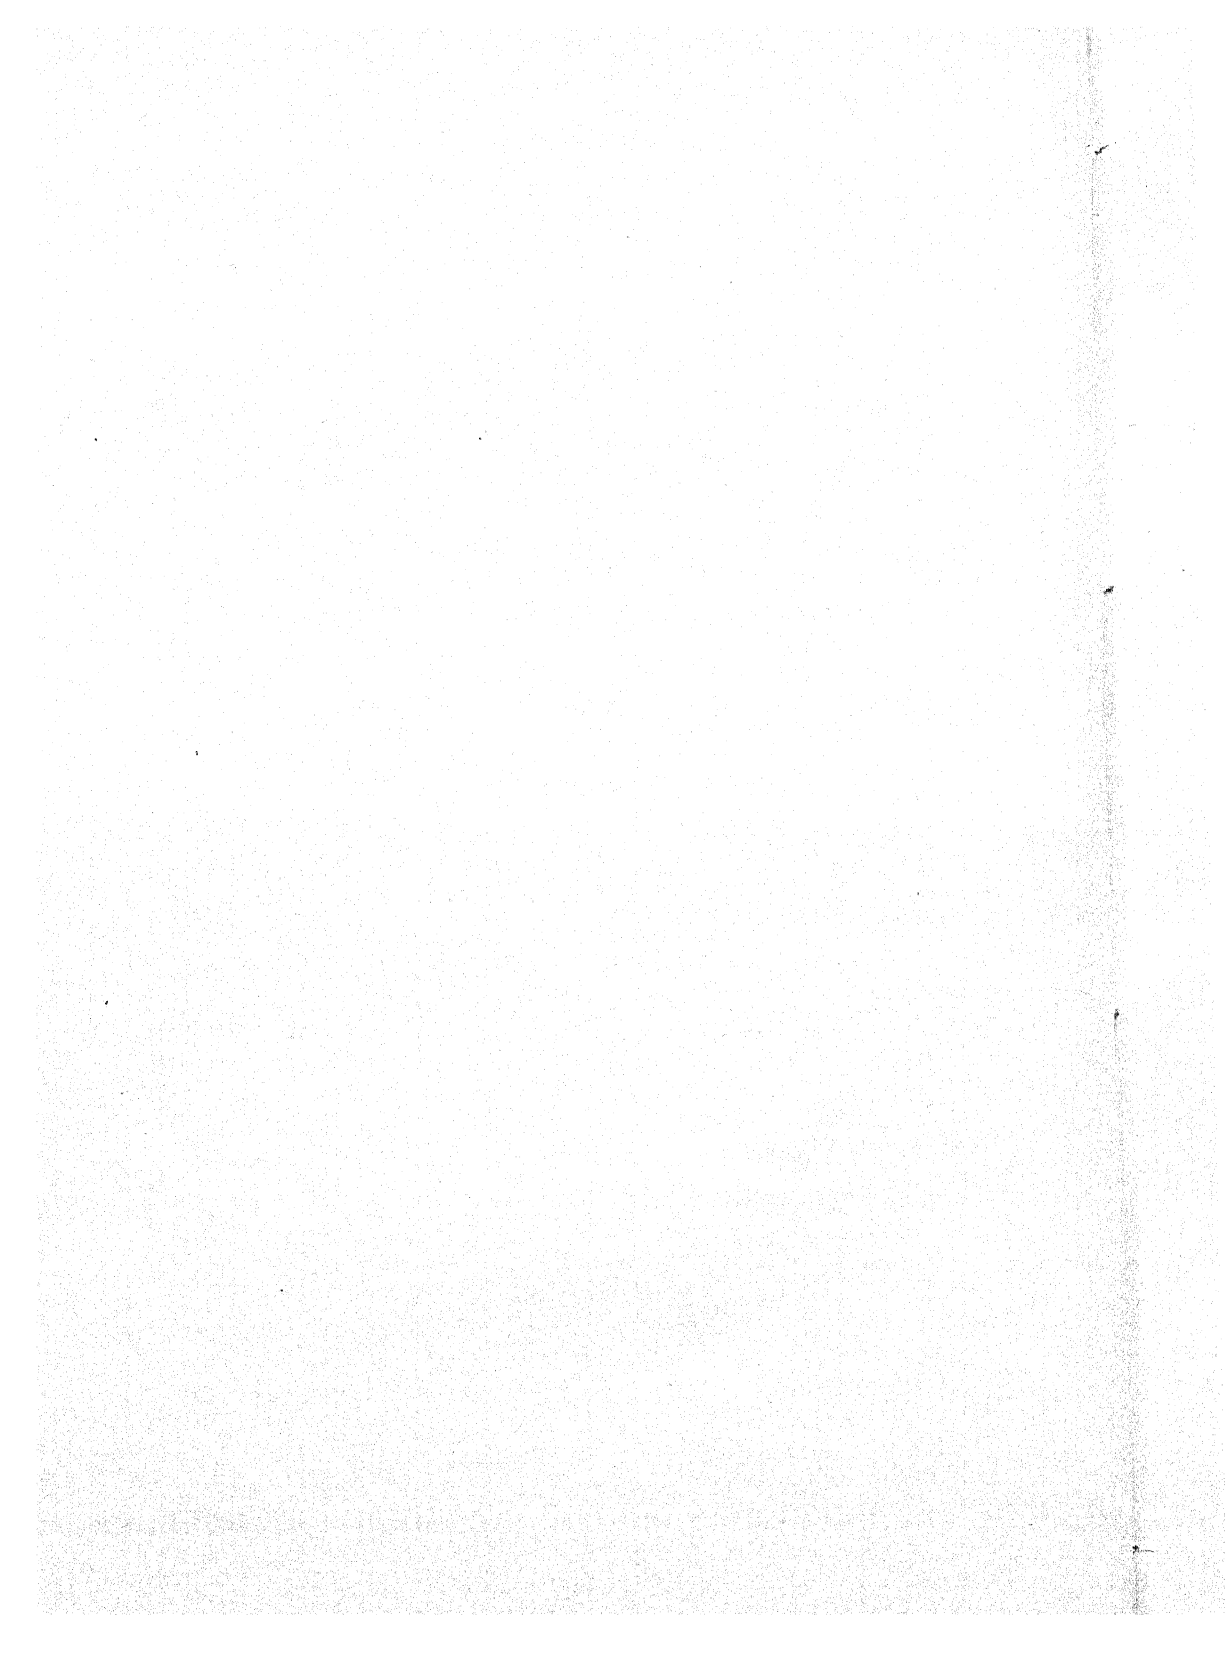

**2 Broken order** A common and often desirable variation for shelf arrangement is to break sequence of numbers, either to put books most used (fiction, juveniles and biography) nearest the delivery desk; or to bring together Sociology (300) and History (900), Philology (400) and Literature (800). The strict theory is to keep the whole 1000 numbers in exact sequence; but a higher rule to be obeyed everywhere is to sacrifice any theory for a substantial gain. Posters or dummies and charts should show clearly where to find any group removed from its natural place.

### Other uses

**Scrapbooks** Use sheets of uniform size, with class number of subject written in upper front corner of the page. Mount clippings on the sheet as in a common scrapbook. When one sheet is full, insert another next it. Thus perfect classification is kept up without blank sheets, and at the smallest outlay of money and trouble. These sheets are then arranged numerically like a class card catalog, the sheets of each class being further arranged, when required, under alphabetic subheads. Scraps thus mounted are shelved either in pamphlet cases or in patent binders, or are kept in vertical files.

**Index cards** These are best made on the standard P size (7.5 x 12.5 cm) card or slip. Light weight catalog card stock is best for private indexes, etc. It is always advisable to use accurately cut cards.

Class number is written in upper left corner, any alphabetic subject head follows at the right, and notes fill the card below. The cards are then filed in order of class numbers, the cards of each class being further arranged, like the scrapbook sheets, according to alphabetic subheads. Paper the size of scrap sheets, 20 x 25 cm, arranged and stored the same way, may be used instead of cards. Scores of devices are obtainable for the convenient handling and storing of these slips, sheets and pamphlets.

## General works

- 000 General works      Prolegomena**
- 001 Knowledge and learning in general**
- 002 The book**  
     Science of the book, history of the book and book arts in general
- 007 Activity and organization in general**
- 010 Bibliography**  
     Including both bibliographies and catalogs. Bibliographies show what books have been written by certain authors (011), or in certain countries (015), or on certain subjects (016); but often not what books there are in any one collection (Catalogs 017-019)
- 011 General bibliographies      Universal catalogs**  
     Entries in author order; if in subject order class in 016. Properly a catalog is of a special collection and so tells where the works may be found. A bibliography disregards actual location and tells what there is, but its contents can seldom be found in any one library  
     **012-016 include both bibliographies and catalogs. 017-019 is limited to catalogs of general collections**
- 012 Of individuals**  
     Alphabetized by subjects of bibliographies (bibliographees), not by compilers; e. g. Chaucer, Dante, Ruskin, etc. A bibliography of an individual may include either works about or by the individual, or both
- 013 Of special classes of authors**  
     e. g. Jesuits, members of French academy, Yale alumni
- 014 Of special forms: anonyms, pseudonyms, etc.**  
     e. g. Frey's *Sobriquets and nicknames*
- 015 Of special countries**  
     Books published in the country. Publishers' lists, current publications. Bibliography of books published in England, as Lowndes or English catalog. The history of literature, i. e. belles lettres, poetry, drama, fiction, etc. goes, of course, with those topics in 800; but the literary history of any given place or period covering the writings on all subjects, as well as in literature, is bibliography, and goes usually in 015, tho the literary history of some special class of authors is 013
- .7 American; e. g. *Publishers weekly, American catalog***
- 016 Of special subjects**  
     Put here also class bibliographies (e. g. *ALA catalog*) and catalogs of libraries on special subjects (026); but for other catalogs arranged by subjects, see 017 and 019

**017-019 Catalogs: library and sale**

Class a catalog of any special subject, whether subject, author, or dictionary, under its subject number in 016, which is the ruling head wherever it conflicts with another. 017-019 therefore include only catalogs of general collections, limited to no one class or subject

**017 Clast catalogs: systematic or logical**

Put any form of alphabetic subject catalog in 019. But put clast bibliographies and catalogs of special subjects in 016

**018 Author catalogs**

See 011 for Bibliographies. Put author and clast bound together in 017. 018 includes accession, chronologic and any other forms (except subject and dictionary) of catalogs of collections

**019 Dictionary catalogs: alphabetico-clast, etc.****020 Library economy**

.5 Periodicals

.6 Societies, associations, clubs, conferences

.62 Local clubs

.7 Education Training Library schools

**021 Scope, usefulness and founding of libraries**

'People's university'; relations to clubs, etc. Also scope and founding of combined libraries and museums. Support, development

.3 Library in relation to schools and other institutions

This is mainly for relations of general public libraries to school work. Class a library owned by and kept at the school in 027.8. Class general work for children with children's libraries in 027.62

.8 Libraries and the state Library laws

State aid: subsidies, free importation, cheap postage, etc.

.9 Support, raising funds, etc.

For state aid separate from local help see 021.8

**022 Buildings**

See also 727 Architecture of educational buildings; but class library buildings here. For care of building see 025.9

.4 Storage and shelving

.9 Fixtures, furniture, fittings

**023 Government and service Personnel**

Charter, bylaws, trustees, librarian, staff; duties, pay, etc.

**024 Rules for readers**

Relation to readers and visitors; qualifications, fees or free use, library hours, reference use, loans, special privileges; injuries and abuses by readers

## 025 Administration Departments

025 is for the librarian's part. The trustees build and furnish (022); make rules for government and service (023), and rules for readers (021); but the administration involves questions of its own, which, however, are closely allied to topics in 021-024 and elsewhere; e. g. the librarian must know his side of binding, and be able to give proper directions and supervision, but need not know all the details of the binder's craft (686)

Administration includes .1 Supervision .2 Acquisition  
.3-6 Utilization .7-9 Preservation: i. e. the librarian's duty to books is to Get, Use, Keep

## .1 Executive General supervision

Finances, accounts, salaries (see 023); supplies, printing; publications, statistics, reports, bulletins, correspondence

## .17 Treatment of special material

Manuscripts, pamphlets, serials, maps, music, etc.

## .2 Accession Acquisition

Selecting and buying books, serials, pamphlets, ephemera; prices, discounts, duty free importation (see 021.8); auctions, old book lists; sale duplicates, exchanges, gifts (see also 021.9); reception, checking bills, collation; plating, pocketing, embossing, private marking; accessioning; order slips, index and book, order and serial blanks

## 3 Catalog

For printed catalogs themselves see 017-019. This is for *cataloging*. Printed, manuscript or card; author, subject, title, class; dictionary or combined. Cooperative rules; size notation; cooperative cataloging; duplicated titles, print or photography; mechanical accessories, cards, cases and fittings, drawers, trays, blocks, checks, guides, labels

## 4 Classification

For philosophic classification of knowledge see 112 Methodology. This is for practical classing of books, pamphlets and notes, rather than theoretic speculation. On shelves; in catalogs; in dictionary catalogs; systems of notation, figures, letters, symbols, combined; importance and advantages; difficulties; close *v.* broad classing; mnemonic features; basis of division; coordination of special subjects

## .5 Reference Reference books Aids to readers

See 028 for general discussion of reading and aids. This is limited to library administration

## .6 Loan

Indicators; charging systems, ledgers *v.* cards; book cards, marks, pockets; call slips, readers cards; notices, reserves; registers; inter-library loans; mechanical accessories, slip cases, trays, tills, stamps, etc. See also 024 for Rules

## 025.7 Binding and repair

Materials, durability, tight v. spring backs, sewing, color, lettering; paper covers and temporary binders; restoring, mending, cleaning, and oiling. See also 686 Bookbinding

## .8 Shelf

Arrangement; shelf numbers; shelf and book labels; fixt and relative locations; sizes on shelves; arrangement and preservation of public documents, pamphlets, papers, manuscripts, maps, drawings and plans, music, broadsides, clippings; injuries, heat, gas, insects; stock-taking; shelf lists. See also 022.4 Shelving

## .9 Building Care, cleaning, safety Janitor Police

See 022 for building and fittings. This is janitor's department

## 026 Libraries on special subjects

Histories, reports, statistics, bulletins, handbooks, circulars and everything about the library not more required in one of the sections above; e. g. a Medical library, a Chess library; but the catalog of a Chess library is 016.7941; blanks, etc. from any library go in 025, as more used in studying topics

## 027 General libraries

This includes both circulating and reference; i. e. all not limited to special subjects. A private library is still class 027.1 after it has been sold or merged in a public library. But reports of a society library changed to a free public should class in 027.4 after the change; and if not too much earlier material already on the shelves, change all to new number instead of making cross reference

## .1 Private and family

## .2 Proprietary: society, club, athenaeum

.2 is limited to libraries that are semi-private, requiring an election for admission, while .3 includes all open to any one on payment of a fee. It is the difference between a club and a hotel. .3 is for libraries run as a business. A mercantile library, even tho it has endowments, if open without individual election, goes in .3 as a subsidized public subscription library. Many private subscription libraries go in .2

## .3 Subscription Circulating Rental

Mudie's, Booklovers, etc.

## .4 Free public Rate supported Endowed

Public library commissions. See also 027, last note, and 331.85 Intellectual life of laboring classes

## .5 State and government

## .6 For special classes

Children, institution, prison, reformatory, asylum, blind, monastic, workmen, factory, railroad, sailors, lighthouse. A workmen's library of books on engineering goes in 026, not here, as the subject is more useful than the class of readers

## .62 Libraries conducted with reference to age and sex

Libraries for men, women, adults, children (including storytelling)

## .7 College University

                 See also 374 Self education

.5      Reading of young      Juveniles  
                  Both discussion and lists of books

029      Literary methods and labor savers

                 Much in 025 and 028 belongs equally under 029 in its full meaning,  
                  but practical convenience is best served by keeping such material  
                  under those heads instead of separating a part here

030      General cyclopedias

                 Subdivisions of 030-050 are by language, not by country

031      American                              036      Spanish

                 E. g. Americana, International

032      English                                      037      Slavic

                 E. g. Britannica, Chambers

033      German                                      038      Scandinavian

                 E. g. Brockhaus

034      French                                      039      Other languages

                 E. g. Larousse

035      Italian

040      General collected essays

                 Bound pamphlets (essays, addresses, etc.), scrapbooks, etc. too general  
                  for any one class. 041 American, 042 English, etc. like 031, 032, etc.

050      General periodicals, magazines

                 051 American, e. g. Atlantic, Century, Harper's, Scribner's; 052 English,  
                  e. g. Athenaeum, Blackwood's, Contemporary; like 031, 032, etc.

060      General learned societies, transactions

                 Divided by country. 061 American; 062 English, like 031, 032, etc.,  
                  except use 068 for *Other countries* instead of limiting it to Scandinavian

069      Museums              Museum economy

070      Journalism              General newspapers

                 Divided by country; e. g. 071 American, 072 English, 073 German,  
                  074 French, 075 Italian, 076 Spanish, 077 Slavic, 078 Scandinavian,  
                  079 Other countries

**080 Polygraphy      Special libraries**

Including sets or 'libraries' so constituted as not to be readily scattered by subjects, and miscellaneous information; but class in 807 *literary* questions and answers. Collections conditioned by terms of gift on being kept together are better clast as a parallel library distinguished by a letter; e. g. The Doe collection D010-D999

**081 Individual polygraphy**

Complete or partial collections of an author's works, treating of various subjects. If they treat exclusively or mainly of one subject they are clast with that subject

**082 Collective polygraphy**

Distinct works of several authors, treating of different subjects and published in a collection

**083 Official publications**

Official publications of countries, states, provinces, cities and other public bodies and powers may be clast together here but are much better clast with subject treated or, if too general for that, with body by which issued

**087 Publications for various classes of readers**

Children's collections may be clast here but are much better kept as a separate collection marked J, the separate books being given their regular subject numbers (see paragraph relating to Juveniles in Introduction, p. 11)

**090 Book rarities**

For books about these topics, and those chiefly valuable because of their rarity; but class a rare early edition of Shakspeare in 322.3

**091 Manuscripts      Autographs**

Class in 096 mss. important chiefly for illumination. Photographs of mss. when more valuable for subject matter, go with subject rather than here. For diplomatics and paleography see 417, and special languages, 421, 431, etc.

**092 Block books****093 Books printed before 1500      Incunabula****094 Rare printing**

Aldines, Elzevirs, Caxtons, etc.; privately printed or unique books

**095 Rare binding**

By noted binders, with costly ornament, curious bindings

**096 Rare illustrations or materials**

Illuminated. Illustrated by inserted plates. Printed on vellum, silk, bark, etc., in gold or silver letters, etc.

**097 Ownership      Bookplates      Ex Libris**

Noted or rare. See also 025.2 Library use of bookplates

**098 Other classes of works, based on inner characteristics**

Prohibited, lost, imaginary, etc.

**099 Other classes of works, based on outer characteristics

## Religion

### 200 Religion in general

201 Philosophy, theories; 202 Compends, etc. like 101-109. Class history, reports, etc. of Bible, Tract, etc. societies in 206, but put their publications with subject. Class theologic seminaries in 207. See also 377 Religious and secular education

### 210 Natural theology

Concerns evidence in nature exclusive of revelation, also Christian or skeptic discussion of specific topics (211-214, 216-218). For general defense of Christian theology see 239 Apologetics

### 211 Deism and atheism

Skepticism, infidelity, rationalism, etc. Atheism denies existence of God. Deism accepts existence, but denies revelation and rejects Christianity. Theism believes in a god supernaturally revealed: e. g. Judaism, Mohammedanism, Buddhism, etc. Arguments from nature in support of any of these views go here. See also 149 Agnosticism, 231 Christian theism, 273 Heresies.

### 212 Pantheism Theosophy

See also 129 Origin of soul, 147 Pantheism.

### 213 Creation Evolution

From religious viewpoint; attempts to harmonize *Genesis* and geology. See also Metaphysics, 113 Cosmology; and Natural science, 575 Evolution

### 214 Providence Theodicy Fatalism

See 231 for Christian view

### 215 Religion and science

Antagonism or reconciliation between science and Bible religion. Arguments of scientists against scientists. Bridgewater treatises. For theologic defense see 239. For creation see 213

### 216 Good Evil Depravity

### 373 Secondary Academic Preparatory

Class here discussions of general theories, methods, etc. pertaining specifically to secondary education, regardless of source of support. Class here also all private or endowed secondary schools for boys or both sexes; all public (taxsupported) secondary schools for boys or both sexes may be class here or in 379.4-9, all elementary schools (regardless of support) in 372, all schools and colleges solely for women in 376, and all colleges for men or for coeducation in 378. Class methods and questions peculiar to monastic, diocesan and parochial schools in 377, but class the schools themselves in 372, 373, 378, etc. according to their grades. For specific topics see 371

#### .4 European schools

Eton, Harrow, Rugby, etc.

#### .7 American schools

Phillips academy (Andover or Exeter), Lawrenceville, etc.

### 374 Adult education

Home education. Self education and culture. Cultural, personal aspect of education. The term Home education covers the broad field of adult self education thru private reading, study clubs and reading circles, summer, vacation, evening and correspondence schools, lecture courses and other forms of extension teaching, and other agencies for extending more widely opportunities and facilities for education outside the usual teaching institutions. For relations of this work to libraries, the natural centers for such activities, see 021. See also 378.1 University extension

- S " miscellany Songs Class day, etc.
- T Alumni Societies, committees, etc.
- U Classes Histories, records, etc.
- V Pictures Class albums
- W Buildings and grounds Descriptions, maps, etc.
- Z Schools: divinity, law, medical, etc.

Better class with subject; e. g. Divinity schools 207

### 379 Public schools Relation of state to education

- .1 Public school system
  - Funds, laws, supervision, etc.
- .2 Illiteracy Instruction of illiterates Compulsory education
- .3 Public v. private and endowed schools
- .4-.9 Public education in special countries
  - Subdivided like 378.4-.9; e. g. 378.42 Public education in England

### 380 Commerce Communication

Public utilities. The technical side of these questions goes mostly in 650 Useful arts. Here belong discussions of social and political relations; e. g. government control of railways, telegraph, etc.

- .1 Theory
- 11 Supply and demand
- .12 Trade channels Commercial expansion Markets
  - Commercial forecasts; trade cycles; commercial crises, panics, depressions; cooperative marketing, commercial arbitration
- .16 Ownership and control of business and public utilities

- 388 Local transit: city and interurban Highways

See also 625 Engineering

- 389 Weights and measures Metrology

- 390 Customs Costumes Folklore

These heads are for discussions by topics. Customs, etc. of any special country go in 913-919. Books on a special topic in a special country go here, as the grouping by topics is the more important; e. g. Marriage in Japan is 392, but Japanese customs 915.2 For customs of primitive man see 571

- 391 Costume and care of person

See also 613 Hygiene, 646 Clothing

- 392 Birth, home and sex customs

- 393 Treatment of the dead

See also 614.6 Public health

- 394 Public and social customs

Including fairs; chivalry, tournaments; dueling, suicide

- 395 Etiquet

Codes of social procedure and behavior. For social ethics see 177

- 396 Woman's position and treatment

For costumes see 391, biography 920.7. If a special library about women is wisht, 396 is the best place for it; but it would be unwise to bring everything about women here; e. g. to remove 618 Diseases of women, from the rest of medicine. Books on woman in general go in 396

- 397 Gipsies Nomads Outcast races

People without nationalities who do not coalesce with the ruling people among whom they live. This includes Gipsy language, which tho now regarded as a modern Sanskrit dialect, has no place in the linguistic groups of 400, as the Gipsy people have no place in the geographic divisions of history

- 398 Folklore Proverbs, etc.

See also 291-293 Mythology. This section is for material needed in studying folklore. Mere stores for children, unless having a value to students of folklore, go in fiction, or in juvenile

- .1 Primitive traditions

- .2 Legends, tales, traditions

Legends of Charlemagne, Faust, Renard the Fox, etc. But poems, dramas, etc. based on these legends class in literature

- .3 Folklore, traditional beliefs and customs, popular superstitions

Origin and explanation of Christmas, New Year, Easter, etc. beliefs and practises

- 398.4      Fairies, elves, ogers, monsters, etc.
  - Bogies, gnomes, dragons, vampires, werwolves
- .5      Chapbooks
- .6      Riddles
- .7      Dream books
  - See also 135 Dreams
- .8      Song books      Nursery rimes      Popular cries
  - Only popular collections, hardly ranking with Poetry or Music but useful in the study of Folklore, etc.
- .9      Proverbs
- 399      Customs of war
  - Weapons, war dances, treatment of captives, scalping, mutilation, burning, cannibalism, etc

## Philology

### 400 Philology in general

The general works put under 400-419 deal almost entirely with Indo-European languages. They are put here because they cover most of the divisions of this class and in practise are more convenient here. Under 439, 479 and 489 are class books limited to the Teutonic, Romance or Hellenic groups, and under 491 are class only works dealing mainly with the Indo-European languages there specified  
401 Philosophy, origin of language; 402 Compendis, outlines, like 101, 102, etc. Class universal language e. g. Volapük, Esperanto, in 403

### 410 Comparative

410-419 includes comparative works in general and also those on the Indo-European group in general, but general and comparative works on Teutonic group are 439; on Romance group 479; on Hellenic group 489. Put everything about an individual language with that language

- |     |              |                       |           |
|-----|--------------|-----------------------|-----------|
| 411 | Orthography  | Orthoepy              | Alphabets |
| 412 | Etymology    | Derivation            | Semantics |
| 413 | Lexicography | Polyglot dictionaries |           |
| 414 | Phonology    | Visible speech        |           |
| 415 | Grammar      | Morphology            | Syntax    |
| 416 | Prosody      | Paleography           |           |
| 417 | Inscriptions |                       |           |

Rare early manuscripts are put in 091; inscriptions of an individual language are class with its orthography; Latin inscriptions 471; Greek inscriptions 481, etc.

- |     |               |               |
|-----|---------------|---------------|
| 418 | Texts         | Sign language |
| 419 | Hieroglyphics |               |
- See also 493 Egyptian hieroglyphics

### 420 English philology

- |     |             |            |
|-----|-------------|------------|
| 421 | Orthography |            |
| 422 | Etymology   | Derivation |
- See also this head treated in general grammars class under 425  
422 is limited to derivation. For inflection, also called etymology see 425

## 423 Dictionaries      Idioms

Put a dictionary of 2 languages with the less known language. Under 423 put only English-English dictionaries. Put an English-French dictionary with French 443; a French-Latin dictionary with Latin 473. If in several languages, put with 413, or with least known. This plan brings together under each of the less known all the dictionaries for translating either into or from that language. Some prefer to put each dictionary under the first language; i. e. that by which it is alphabeted. This gives under *each* language, regardless of its familiarity, *all* dictionaries for translating *from* it, but none for translating *into* it. These must be sought under the language from which the translation is to be made. For a cosmopolitan library this plan is simplest and best; but in an English library, the first plan, with only English dictionaries in 423, and both *in* and *out* dictionaries together under little known tongues, is more convenient. References in either case show what may be found in the other place.

## 670 Manufactures

Specific topics go where of most interest. These heads are for the *general* subject of metal, wood, etc. manufactures, and for such specific manufactures as are not of more interest elsewhere. But a specific manufacture is commonly most useful with its own subject; e. g. a steam engine is certainly made of metal, but its manufacture should go under 621.1, not 672. Character of the library often decides the place of greatest interest. An agricultural library would prefer the manufacture and everything about wood churns with the dairy, 637, while a manufacturing library might prefer it with other wood manufactures in 674. A general library will incline to the special subject, as a more minute classification is thus obtained, and catalog references answer inquiries for all the library has on brass or rubber or paper manufactures. Whether grouped by use or material, if sought from the other standpoint, references show the resources promptly. As a rule the use is the better classification, being more minute and oftener wanted. But if uses are various the general head is better; e. g. bells are for scores of distinct uses, but their manufacture is a unit; but all churns are for the dairy

### HOW TO USE THIS INDEX

Find the subject wanted in its alphabetic place in the index. The number after it is its class number and refers to the place where the topic will be found, in numeric order of class numbers, on the shelves, shelf lists, or in the class catalog, if used. All class numbers are decimal; e. g. 914.29 travel in Wales, comes before 914.3 travel in Germany, and both of them before 915 travel in Asia. Printed labels on the shelves or drawer fronts guide readily to the class number sought.

Under this class number will be found the resources of the library on the subject desired. Other adjoining subjects may often be profitably consulted; e. g. a description of Niagara Falls is wanted and the index refers to 917.47, but much on this topic is likely also to be found in 917.4 (travel in north Atlantic states) and even in 917.3 (travel in United States).

#### **This index contains**

in a single alphabet all subjects named in the tables, together with their synonyms and such other topics as are thought most likely to be needed by libraries using this abridgment.

If nothing is found on the shelves under a number, it shows that the library does not yet possess any book on that topic.

#### **It does not include**

all names of places, minerals, plants, diseases, etc.; but gives only those used in these tables and a farther selection of the most common and useful. It is not a biographic dictionary, and gives **no names of persons** as biographic heads, but only such as appear in connection with some subject like literature or history.
